DETAILED ACTION

Claims 1-32 are pending.

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-32 are rejected under 35 U.S.C. 102(b) as being anticipated by compound in column 15 and the Abstract of Vallee et al (US 5,886,028) for reason of record.

Claims 1-3,6-13,16-23,26-28,31-32 are rejected under 35 U.S.C. 102(b) as being anticipated by compounds in Figure 1 of Zheng et al for reason of record.

Claims 1-3,6-13,16-23,26-28,31-32 are rejected under 35 U.S.C. 102(b) as being anticipated by compounds NPI-031D and NPI-031E in column 6 of Pei et al for reason of record.

Claims 26-28,31-32 are rejected under 35 U.S.C. 102(b) as being anticipated by compound in the Abstract and line 54 column 1 to line28 column 2 of Ito et al for reason of record.

Claims 26-28,30-32 are rejected under 35 U.S.C. 102(b) as being anticipated by compounds (I) and (II) in page 1 of French patent FR 2190411 for reason of record.

Claims 26-27,29, 31-32 are rejected under 35 U.S.C. 102(b) as being anticipated by compounds 1-24 in pages 1097-1098 of Jagdish et al for reason of record.

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

Art Unit: 1625

Claims 1,3,6-32 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. The proviso in the amended claims raises the issue of new matter since the specification does not provide such teachings and/or the working examples to support the same. Chemistry is not an exact science and is unpredictable, since the chemical structures of the current compounds are complicated, it requires undue experimentation to make the currently claimed compounds. The claims also fails to provide a known and/or recognized disease so that one of ordinary skilled in the art can make and/or use the claimed invention since the term “inhibiting ALDH-2” and “identifying a compound that modulates ALDH-2” do not stand for a known or recognized disease. A patent is not a hunting or fishing license, it should contain information ready or handy for an artisan to make and/or use the claimed invention.

Applicant's remarks filed on 2/4/2005 become moot due to the new ground of rejection.

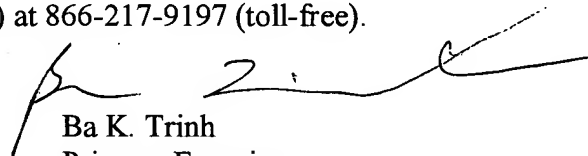

No claim is allowed.
